

Everything you need to know about

Namibia

Namibia is the land of a thousand landscapes. From the famous dunes of Swakopmund to the beautiful ocean views along the Skeleton coast, if you're looking for adventure - this is the place.

Namibia offers you an alternative safari destination, boasting harsh landscapes and intriguing wildlife that has adjusted to its desolate environment. With the opportunity to see all of the Big 5 and explore one of Africa's oldest deserts, Namibia offers up unforgettable wilderness adventures.

Namibia highlights

1/4

The Skeleton Coast

The Skeleton Coast was named after hundreds of shipwrecks washed up on the Namibian shores between Swakopmund and the Angolan border. This is where desert meets ocean, creating a landscape that Namibia has become famous for through the years.

2/4

Etosha National Park

Etosha National Park has a large range of wildlife on offer, where bustling waterholes are crowded with big game animals and predators are present in abundance. The National Park is a wildlife sanctuary, hosting over 250 species of birds as well as numerous other incredible game, including gemsbok, springbok and black-backed jackals.

3/4

Fish River Canyon

This expansive canyon plays host to many of our favourite adventure activities in Namibia. From hiking through the canyon to sleeping on the edge of the canyon, this is one of the most impressive and challenging spots you can experience in African travel.

4/4

Damaraland

Damaraland will bring out the historian in you, with scenery cut from dramatic rock formations. Evenings can be spent under the stars, while days are fueled by tours through ancient outdoor art galleries. The area is a UNESCO World Heritage Site, with up to 5,000 carvings and paintings dating back thousands of years.

Best time to go (and why)

All year round

You will experience the best wildlife encounters during the dry season between June and October. Animals are often seen congregating around water sources amidst the sparse vegetation.
